Is this student in aftercare? _____

Who is authorized to pick up?

Birney Elementary

1 hour lessons from 1:40 to 2:40

September 4, 11, 18, 25,

October 2, 9, 16

\$140/7-week session

Cost includes all materials

Learn to play music in a fun and nurturing environment.

Students receive personalized keyboard instruction, work on songs of their choice, and develop musical skills in a “go-at-your-own-pace” pressure-free setting.

All ages welcomed. We walk children to aftercare when it's over.
Let us know if you need this service.

Dear Parents,

We are a San-Diego based after-school enrichment program, going into our seventh year of teaching elementary school students how to play piano, using electric keyboards. Our class curriculum is extremely fun—it relies on a diverse music library of "kid-friendly" music and our upbeat instructors. We also provide students with passes to our online student portal, so they have 24-hour access to video instructions that help ensure a positive practicing experience.

How we teach

Our teaching method relies heavily on one-on-one instruction divided among the class. Individual keyboard stations and headphones are provided to ensure privacy for each student and enable them to have their own individual experience, and the kids love the keyboards. We have sheet music for every level of experience, ranging from early beginner to advanced. Students progress at their own pace.

Students learn songs they request

Our constantly expanding music library, filled with students' song requests (from the radio, television, Disney movies, and video games, etc.), keeps our students engaged. Current song favorites include: Gravity Falls Theme Song, 7 Years, Harry Potter, Moana, Star Wars, Believer by Imagine Dragons, Lego Ninjago, and many more. As new songs are requested, we prepare arrangements tailored to our students' abilities—easy versions for beginners and advanced versions for more experienced students.

Fostering a life-time love for music

A love for music is a timeless asset; a pleasurable experience that relates to mathematics and stylistic expression. Students also gain basic music comprehension. Every session concludes with a recital performance finale and friends and family are invited to the event. In the class days leading up to the recital, students practice presenting their musical piece, as well as projecting their voices for their introduction. We focus on strengthening children's self-esteem and confidence through positive reinforcement and new personalized goals set each day. The opportunity to present in front of an audience with confidence is another of the many assets that come with completing a session.
